WATER HEATERS
CATALOGUE
JAN|2024

A COMFORTABLE BATHING EXPERIENCE

Water Heaters are an essential part of modern life. They have, however, come a long way from where they were, thanks to an evolutionary process that included trial and error, and are now substantially better and safer. Expanding on this concept of improvement, GM introduces to you water heaters that are more convenient and even more capable of giving you a comfortable bathing experience.

THE COMPANY

Everything began with a dream to make comfort a reality. In 2002, the company came into existence with the objective of making things easier and life simpler. With passion, diligence, commitment and honesty we created wonderful products for a better world. We began with the switches, moving on to LEDs, progressively towards automation, gradually touching every metaphor of a good smart home. And now we are proud to introduce the latest addition to the appliances category - Electric Water Heaters that will carry the GM logo.

With proper research in design and material, GM Electric Water Heaters have grown with a design aesthetic of clean lines, correct proportions and less-is-more philosophy. Artists with tremendous experience in the industry, have worked with crisp precision on every product.

We believe in sustainability based on the simple premise that if something is well-made and beautiful it will have a long and useful life. By sourcing local materials and components we are supporting our environment, community and economy. We continue to follow our aspiration to provide a product that will last as a mark of fine innovation and technology.

PRESENTING OPULENT EXPERIENCES THROUGH EVERYDAY LIFE ESSENTIALS

GM is built on innovation, and its main goal is to present the world with fully opulent and sumptuous experiences through basic and imaginative everyday life essentials. Simplicity is a key aspect in making innovation a true success, and GM seeks to build innovations that are simple yet intelligent.

With the same spirit of innovation and sophistication, I, the company's proud ambassador, is delighted to announce the addition of a whole new segment to its well-established verticals - The Electric Water Heaters.

-Suniel Shetty
Brand Ambassador

STORAGE WATER HEATERS

Introducing the GM Storage Water Heaters in metal and plastic bodies that have both large and small capacities for storing and heating water. The water heaters are convenient, safe and simple to operate, and are intended for use by both big and small families.

PRESENTING THE MOST STYLISH FORM

The GM Water Heater in circular plastic body is the most stylish form in contemporary times. With its dainty and delicate appearance, the water heater not only enhances the attractiveness of the interiors, but also amazes with its superb functionality. Its unique Hydrodynamic Technology that enables hot and cold water mixing, provides immense comfort and convenience.

A SIGNIFICANT CONTRIBUTOR TO YOUR LUXURIOUS LIVING

A lavish bathing experience is an important component of the modern lifestyle, and hot water is the foundation of a relaxing bath. GM introduces innovations that enhance this experience with modern features and exceptional functionality, considerably contributing to your luxurious existence.

DESIGN THAT NEVER GOES OUT OF STYLE

The new GM Water Heater with round plastic body is a design that never goes out of style. With high water storage and heating capacity, the water heater made of high-quality plastic is an ideal hot water solution for all times. The water heater is 5-star rated and energy efficient, making it environmentally friendly. Moreover, it can be used in both hard water areas and high-rise buildings.

To make a better world, make life simpler.

We are unwavering in our commitment to a set of core beliefs. It extends beyond merely innovating products; it encompasses every action that resonates with the people and the environment we engage with. We recognise our responsibility to approach things distinctively and improve upon existing methods. Here are a few initiatives we have already set into motion.

CLIMATE IMPACT

At GM Modular, we champion the Climate Impact cause. In our pursuit of sculpting a cleaner, better world, we've embarked on a strategic policy initiative. Our commitment lies in harmonising operations and strategies with environmentally friendly principles.

RECYCLE

Our ongoing mission is to maximize efficiency while minimizing waste. We diligently strive to utilise recyclable resources in our processes. Whether it's reclaiming tiny metal pieces or mitigating environmental impact in production, we are dedicated to the thoughtful reuse of materials.

LOCALLY SOURCED

We encourage the use of locally sourced materials over imports. This increases supply chain efficiency and reduces soaring transport costs, thereby contributing to a significant decrease in CO₂ emissions.

BETTER HOME ENVIRONMENT

A healthy home environment is paramount for overall well-being. Beyond ventilation and construction materials, the elements inside your home play a crucial role in shaping its indoor atmosphere. At GM, we prioritise the exclusion of any harmful raw materials that could potentially compromise the health and well-being of those within.

CERTIFIED

In our commitment to empowering consumers and help them make informed choices for a healthier lifestyle, GM products have obtained safety certifications from reputable authorities worldwide. Rigorously tested for functionality, our products meet stringent standards to ensure the well-being of our users.

Harmonizing design and technology

The GM product range sets standards in design, function and technique. GM offers high-quality design, attractive colours and numerous intelligent functions with switches and automation.

Our intent is to raise the quality of life and therefore, all products are designed to harmonize perfectly, with each other. From switches to socket outlets, from music technology to home automation, the use of GM products is not only attractive, but also convincingly comfortable. Having clear operating instructions in our packaging with the most important technical data assists in the safe and faultless installation of every GM product.

SWITCH TO A BETTER WORLD
